

Hasindu Wanninayake

Full Stack Software Engineer | Software Engineer | AI Integration

Colombo, Sri Lanka | +94 77 939 3662 | hasindutwm@gmail.com | linkedin.com/in/hasindu-wanninayake-1ab155276 | github.com/Iron-voldy | hasindu-theekshana-theta.vercel.app

PROFESSIONAL SUMMARY

Full Stack Software Engineer with 3+ years of hands-on experience building production web applications, REST APIs, database-backed systems, and AI-enabled automation workflows. Strong in MERN stack development, Java/Spring Boot, PHP/MySQL, responsive frontend development, backend API design, and SQL/NoSQL database design. Currently the sole Full Stack Software Engineer at Aahaas, owning features from requirements and architecture through development, testing, deployment, and production support. Practical AI engineering experience includes LLM API integration, prompt engineering, n8n workflow automation, AI chatbot development, and business process automation.

CORE TECHNICAL SKILLS

Languages: JavaScript, Java, Python, PHP, HTML5, CSS3, SQL

Frontend: React.js, Tailwind CSS, HTML, CSS, JavaScript, Responsive Web Design, UI Implementation

Backend: Node.js, Express.js, Java Spring Boot, Hibernate, REST API Development, Authentication, Server-Side Application Development

Databases: MySQL, MongoDB, Firebase Realtime Database, Database Schema Design, Query Design, Mongoose ODM

AI and Automation: LLM API Integration, Prompt Engineering, n8n Workflow Automation, AI Chatbot Development, Conversational AI, wit.ai NLP, AI-Powered Business Automation

Tools and Practices: Git, GitHub, Postman, VS Code, IntelliJ IDEA, Firebase, Agile/Scrum, SDLC, OOP, Data Structures and Algorithms, UML, Testing and Debugging

PROFESSIONAL EXPERIENCE

Full Stack Software Engineer - Aahaas, Colombo, Sri Lanka Jan 2025 - Present

- Own full-stack development for Aahaas, a lifestyle and travel platform, delivering production features across frontend, backend, database, and automation layers.
- Architected and built AI-powered travel itinerary generation using LLM APIs, n8n workflows, Node.js services, REST APIs, and MySQL-backed data flows.
- Developed an AI quotation automation system for Apple Holidays, using prompt engineering and workflow automation to generate business quotations with reduced manual effort.
- Designed database schemas, API endpoints, frontend screens, and workflow integrations to support travel planning, quotation generation, and internal business operations.
- Collaborate with product and business stakeholders to convert requirements into reliable technical solutions, then test, deploy, and support the features in production.

Junior Software Developer (Contract) - Xsoftus, Sri Lanka 2024 - 2025

- Built and maintained client websites and full-stack software solutions using JavaScript, PHP, MySQL, HTML, and CSS.
- Developed responsive user interfaces, backend logic, database tables, and REST-style application flows based on client requirements.
- Fixed bugs, improved page behavior, and supported delivery of multiple client projects within agreed timelines.

Software Development Tutor - Destiny Lab, Sri Lanka 2022 - 2025

- Taught Java, JavaScript, web development, Android development, OOP, and software development fundamentals to beginner and intermediate students.
- Created practical coding exercises and project-based learning sessions covering frontend, backend, database, and mobile application concepts.

Software Development Intern - Sysoft Developers, Sri Lanka May 2022 - Oct 2022

- Developed client-facing websites and software features using PHP, HTML, CSS, JavaScript, and MySQL.
- Assisted with full-stack development tasks including UI updates, backend logic, database changes, bug fixes, and deployment support.

SELECTED PROJECTS

AI Travel Itinerary System - Aahaas

Node.js, n8n, LLM APIs, MySQL, REST APIs

Built an AI-powered travel itinerary system that creates personalized travel plans using LLM prompts, workflow orchestration, backend services, and MySQL data flows.

Hotel Table Reservation System

Java, Spring Boot, MySQL, REST APIs, QR Code Integration

Developed a full-stack reservation platform with booking management, availability handling, and QR code check-in functionality.

AI Quotation Automation System - Apple Holidays

LLM API Integration, n8n, JavaScript, MySQL, REST APIs

Developed a quotation automation platform connecting data collection, processing logic, prompt generation, and output handling for business quotations.

Diatel AI Chatbot Application

PHP, wit.ai NLP, MySQL, JavaScript, HTML, CSS

Built a conversational chatbot web application using wit.ai NLP for intent recognition, response routing, and multi-step user conversations.

IoT Piano Visualizer

PHP, ESP32, IoT Sensors, RGB LED, Web Application

Engineered a hardware and web application system connecting an ESP32 microcontroller to a browser interface for real-time piano visualization.

Foody E-Commerce Web Application

PHP, MySQL, JavaScript, HTML5, CSS3

Built an e-commerce application with product catalog, cart management, order processing, authentication, and MySQL-backed backend logic.

EDUCATION

BSc (Hons) in Information Technology - Sri Lanka Institute of Information Technology (SLIIT) | 2024 - Present

BEng (Hons) in Software Engineering - IIC University | 2022 - 2026
