Summary

I am a passionate and driven Full Stack Developer currently working at Aahaas, specializing in modern web application development and AI-powered automation systems. With strong expertise in Java, PHP, Python, MERN stack, and mobile app development, I build scalable, secure, and user-focused digital solutions.

At Aahaas, I contribute to developing intelligent AI automation systems, including AI-driven travel itinerary bots and smart workflow solutions that enhance customer engagement and business efficiency. I have experience leading projects across healthcare systems, e-commerce platforms, IoT applications, and AI-integrated systems.

I am committed to continuous learning, innovation, and leveraging emerging technologies to deliver impactful and future-ready solutions.

Skills	Java	JavaScript	MySQL	Git / GitHub
	SpringBoot	React	MongoDB	REST API
	Node.js	Tailwind CSS	hibernate	Mongoose

Education	BSc (Hons) in Information Technology - Sri Lanka Institute of Information Technology (SLIIT)	2024 - Present
	BEng (Hons) in Software Engineering - IIC University	2022 - 2026

Work Experience

- Tutor at Destiny Lab

Instructed students on software development, including Java, web development, and mobile app development.

2022-2025
- Intern at Sysoft Developers

Developed websites and software solutions for clients, focusing on high-quality code and client satisfaction.

May 2022 - Oct 2022
- Junior Software Developer (Contract-based) at Xsoftus

Worked on developing websites and software solutions for various client needs, ensuring timely delivery and code quality

2024-2025
- Full Stack Software Engineer at Aahaas

Worked on developing and maintaining web applications for Aahaas, a lifestyle travel super-app, and led the development of their AI-powered travel itinerary system, ensuring high-quality code and timely feature delivery as the sole developer on the team.

2025 - present

Projects

1. IoT Piano Visualizer

[\[https://github.com/Iron-voldy/IOT-Piano\]](https://github.com/Iron-voldy/IOT-Piano)

Technologies: PHP, ESP32, IoT, RGB LED, Web Application, Sensors
2. Ravana Health Care Application

[\[https://github.com/Iron-voldy/SAD_finalProject\]](https://github.com/Iron-voldy/SAD_finalProject)

Technologies: Java, QR Code, Database Management, Hospital Management
3. Diatel AI Chat Application

[\[https://github.com/Iron-voldy/diatel-chatbot\]](https://github.com/Iron-voldy/diatel-chatbot)

Technologies: PHP, Web Application, wit.ai
4. Hotel Table Reservation System

[\[https://github.com/Iron-voldy/sliit-tableBooking\]](https://github.com/Iron-voldy/sliit-tableBooking)

Technologies: Java, QR Code, Database Management, web development
5. foody e-commerce web application

[\[https://github.com/Iron-voldy/foody\]](https://github.com/Iron-voldy/foody)

Technologies: HTML, CSS, JS, PHP, MySQL
6. AI Quotation system

[\[https://ai.appleholidaysds.com/login\]](https://ai.appleholidaysds.com/login)

Technologies: LLM models, web developement, Database Management , n8n
7. shopEase

[\[https://github.com/Iron-voldy/shopease-androidJava\]](https://github.com/Iron-voldy/shopease-androidJava)

Technologies: Java, Android, Firebase
8. AI-Travel Itinerary

[\[https://www.dev.aahaas.com\]](https://www.dev.aahaas.com)

Technologies: n8n, LLM models, MySQL

Personal Skills

Strong understanding of Data Structures & Algorithms
Knowledgeable in Object-Oriented Programming (OOP) & Agile Methodologies
Proficient in development tools such as VS Code, IntelliJ, and Postman
Experience with UML diagrams, Fine-tuning & Prompt Engineering a LLM
Effective Communication & Teamwork Skills
